What is the AMOC?

Met. office, 2025

Physical impacts Societal impacts

- Methodologically robust
- Mechanistically detailed
- Spatially global

- Scarce and rarely quantified
- Concentrated in the GN
- Sector-specific

Van Westen et al., 2024

Beyond Tipping Points: An integrative Synthesis of the Socio-Economic Impacts of AMOC Weakening

1

Systematic Literature Review

- *PRISMA-2020 based pipeline*
- *136 studies*
- *Notion Database for impact classification*

2

Clustering analysis

- *Co-occurrence network*
- *Unsupervised agglomerative clustering*

Beyond Tipping Points: An integrative Synthesis of the Socio-Economic Impacts of AMOC Weakening

3

Impact chains development

- Focus on systems highlighted in the clustering analysis
- Developed impact chains from physical to societal impacts

4

Expert workshop

- Individual reflection: Questionnaire based evaluation of SLR
- Collective reflection: serious game on impact chains

Tseliou et al., in prep

Physical papers dominate the academic literature

AMOC weakening reaches agriculture through many pathways and cascades into food, trade, and migration

Blind spots? Health, Migration, Pesticides, Livestock, Infrastructure

Preliminary conclusions

- Societal evidence is too thin for policy
- Infrastructure, agriculture, energy and fisheries dominate the societal impact stories
- Health and migration are barely assessed but are important according to experts
- Possible cascades and links between systems remain elusive but are important according to experts

Tseliou et al., in prep

Het warme water in de oceaan houdt eerder op met stromen

Klimaat Utrechtse onderzoekers hebben berekend dat de AMOC, de zeestroming die warm water door de Atlantische Oceaan naar West-Europa voert, mogelijk deze eeuw al instort.

The warming atmosphere is causing an arm of the powerful Gulf Stream to weaken, some scientists fear.

How about the newspapers?

“Overall, Dutch journalistic media often accurately convey the core concepts of AMOC-related scientific research papers, but place strong emphasis on societal consequences and opportunities of an AMOC collapse.”

Te Koppele & van Sebille, 2026

Considerations

Considerations

Do people actually know? Or should we set up a game? Or is there historical data?

Methods:
Interviews/focus groups → How do different narratives shape people's perception?

Methods: ABMs based on theory AND data about the public perception (and the climate system?)
